

No. 1201 JANUARY – JUNE 2012 SAFETY & HEALTH COURSES December 8, 2011

THIRD ANNUAL MIDWEST CONSTRUCTION SAFETY CONFERENCE

The Builders' Association Third Annual Midwest Construction Safety Conference will be held on March 21, 22, and 23, 2012, at the Adams Pointe Conference Center located in Blue Springs, Missouri. Richard Fairfax, Deputy Assistant Secretary of Labor for OSHA is scheduled to be the opening keynote speaker and Howard Mavity Senior Partner, Practice Group Chair at [Fisher & Phillips LLP](#) is scheduled to be the closing speaker. Other presenters will include the OSHA Region VII Regional Administrator, OSHA Kansas City Area Office Director, and OSHA St. Louis Area Office Director. Conference sessions will include topics ranging from OSHA, DOT, EPA Compliance to a Workers' Compensation Round Table Discussion. Early bird registration fee is only \$195.00 per attendee for the two-day event, or \$320.00 per attendee for the three-day event. For more information or to register online go to www.buildersassociation.com.

FIFTH ANNUAL CONSTRUCTION SAFETY EXCELLENCE AWARDS BREAKFAST

The Builders' Association Fourth Annual Construction Safety Excellence Awards Breakfast will be held on Thursday, March 22, 2012, at the Adams Pointe Conference Center located in Blue Springs, Missouri. This program is sponsored by The Builders' Association, Missouri Division of Labor Standards, Kansas Department of Labor, OSHA Region VII Office, and the OSHA Kansas City Area Office. Chuck Adkins, CIH, Regional Administrator for OSHA Region VII Office is scheduled to present the Grand Award. Last year over 270 people attended this breakfast. The cost to attend is \$35.00 per attendee and includes a full-breakfast buffet. For more information or to register online go to www.buildersassociation.com.

L JOBSITE SECURITY – WHO'S WORKING YOUR PROJECT'S NIGHT SHIFT?

Description: When thieves steal equipment and materials from your construction site, we all suffer consequences. Angry workers, missed deadlines, higher insurance costs, and dwindling margins. At this Lunch & Learn, you will see the nation wide scope of the theft problem in the construction industry and learn best management practices to keep your site secure, preventing theft. You will analyze current scenarios and see real world examples. You will walk away with knowledge and confidence to combat the growing theft epidemic in construction.

Johnson County Contractor Licensing Program – Approved for 1 hour of non-code credit.

L OSHA FOCUS FOUR HAZARD COURSE

Description: This course focuses on the top four hazards in the construction industry (falls, electrocutions, struck-bys and caught-ins. Construction workers make up approximately 6% of the country's workforce, but account for more than 20% of all job related fatalities each year. Construction is one of the most hazardous industries in America; each year a substantial number of construction worker's lives are taken and countless others are injured by these four hazards. Participants will be introduced to accident prevention techniques and hazard recognition to improve their awareness about the focus four hazards and ways to abate these hazards. Upon successful course completion, each participant will receive a Builders' Association Photo ID Data Card.

📍 OSHA FALL PROTECTION COURSE

Description: OSHA Construction Safety Regulations state that employer shall provide a training program for each employee who might be exposed to fall hazards. The program shall enable each employee to recognize the hazards of falling and shall train each employee in the procedures to be followed in order to minimize these hazards. This Fall Protection Training Course will include but is not limited to: establishing definitive parts of Personal Fall Arrest Systems (including body supports, lanyards, self-retracting lifelines, rope grabs, and anchorage components), anchorage points (determination and suitability), arresting forces (limits, methods to reduce, etc.), and fall distances (limits, deceleration distances). We also cover the usage of equipment including: ladder climbing systems, horizontal lifeline systems, rescue and retrieval systems, rope grab systems, self-retracting lifelines, and care/maintenance of fall protection equipment upon request. Upon successful course completion, each participant will receive a Builders' Association Photo ID Data Card.

📍 EPA – RENOVATION, REPAIR, & PAINTING LEAD-SAFE WORK PRACTICES COURSE

Description: On April 22, 2010, the Environmental Protection Agency (EPA) started requiring firms performing work that disturbs lead-based paint in residential homes, child care facilities, and schools built before 1978 be EPA certified, ensure necessary EPA certified renovators are on each job, ensure all workers affected are trained in specific work practices to prevent lead contamination, all work is performed according to EPA work practices, pre-renovation education required for residents, and ensure record keeping requirements are met. Additionally, all persons are required to be licensed/certified by the appropriate State agency where the work is occurring or by EPA. There is also a requirement for refresher training for any person who becomes licensed/certified every 5 years. Penalties for performing work without being EPA certified can lead to penalties of up to \$37,500 per violation, per day. The Builders' Association is an EPA accredited training provider. This course is approved for purposes of certification under Section 402 of TSCA for the respective discipline.

OSHA 10-HOUR CONSTRUCTION OUTREACH COURSE

(Participants must attend all dates to receive course completion card.)

Description: The OSHA 10-Hour Construction Outreach Course provides safety and health training to prepare employees for basic hazards found in the construction industry. Participants will gain an understanding of OSHA's Construction Safety and Health Regulations as they apply to real world experiences. Each participant will receive a 29 CFR 1926 Construction Standards Book. Upon successful course completion, each participant will also receive a Builders' Association Photo ID Data Card and a U.S. Department of Labor (OSHA) 10-Hour Construction Outreach Completion Card.

Missouri House Bill 1549 - This course meets the requirements of HB 1549 that became effective on August 28, 2009, requiring all on-site employees for contractors or subcontractors working on "Public Works" construction projects in which the contract or subcontract was signed on or after August 28, 2009, to have completed an OSHA 10-Hour construction safety program or equivalent within sixty (60) days of beginning work on the project.

OSHA EXCAVATION COMPETENT PERSON COURSE

Description: This course has been designed specifically for those involved in excavation, trenching, and related operations. OSHA requires a “Competent Person” to oversee these jobsites, as they are some of the most hazardous of all construction operations. Topics include explanation of the excavation standards, soil classification, protective system requirements, access and egress, exposure to falling loads and traffic, water accumulation, and hazardous atmospheric hazards and rescue planning. Upon successful course completion, each participant will receive a Builders’ Association Photo ID Data Card.

OSHA CONFINED SPACE ENTRY COURSE

Description: This course is designed to increase the knowledge of personnel that work in or around a Confined Space. This course addresses training requirements for working in the two types of confined spaces: permit-required confined spaces (PRCS) and non-permit-required confined spaces (NPRCS). This course will emphasize that serious emergencies can develop quickly in confined spaces and provides information on how to prevent accidents and injuries as a result of working in confined spaces. Topics include identifying and addressing the hazards involved with confined spaces, methods of controlling them, and how to implement safety devices and rescue operations. This “Confined Space Entry” training is designed to improve awareness of such hazards, and provide managers and confined-space entry supervisors with the basic information to establish a confined-space safety program. Upon successful course completion, each participant will receive a Builders’ Association Photo ID Data Card.

OSHA SCAFFOLDING COURSE

Description: If you use scaffolds, or if you have contractors who use scaffolds on your premises, you have responsibilities for the safety of that system of its employees. This training course will help participants to know and understand those responsibilities and requirements, as OSHA requires them. This course will also train employees on the dangers of scaffolds and how to minimize risks by knowing the correct ways to erect, maintain and use scaffolding equipment, show all possible responsibilities of a "Scaffold Competent Person", ensure all participants have the knowledge to create a level and stable foundation, discuss power line hazards and distance or protection requirements, ensure proper access with appropriate ramps and/or walkways, and ensure all participants understand platform & planking assembly and hazards. Upon successful course completion, each participant will receive a Builders' Association Photo ID Data Card.

🔗 WORK ZONE SPECIALIST COURSE

Description: This course is for anyone who works in or around construction work zones. Participants will learn about construction work zone safety from the Manual Uniform Traffic Control Devices 2009 Edition. Participants will also learn about one-person and two-person flagging operations, and experienced flaggers can attend this course as a refresher. The course objective is to learn how to be safe and effective in Construction Work Zones. To measure the success of this class, there are several things all participants will be expected to fully understand and be able to do when the course is completed. Attendees will take a written examination, followed by a demonstration that must be successfully completed by each participant. Upon successful course completion, each participant will receive a Builders' Association Photo ID Data Card.

🔗 OSHA BASIC RIGGING & SIGNAL PERSON COURSE

Description: This course will cover both rigging and signal person training requirements as set forth in the new OSHA Construction Crane Standard, Subpart CC, which became effective November 8, 2010. This course will cover the elements of a rigging plan to ensure safe work during hoisting activities. It will also cover all types of rigging and materials, including slings and chains, and types of hardware used, and how to properly inspect them for defects and when to remove from service, manufacturers' recommendations for load ratings, and emphasize the importance for locating the center of gravity for all loads and calculating the load angle of the rigging from horizontal to ensure the proper rigging is used. The signal person portion of this course will ensure each participant has the knowledge of signals to be qualified by demonstrating and understanding of the different types used for crane activities including new, voice or audible, radio or electronic, or hand signals. All participants will receive a copy of standard hand signals, which must be posted in the crane or near the work areas. They will perform a practical exercise of hand signals, and complete a written learning exercise to ensure comprehension of the course materials and the OSHA requirements for signaling. Upon successful course completion each participant will receive a Builders' Association Photo ID Data Card.
